(*) Exact drying times depend on the ambient temperature and relative humidity during application and drying.

Surface Preparation

- Apply to dry, clean surfaces free from any material that may impair adhesion.
- Successful application depends on correct substrate preparation and proper application of the product.

Application

- Prime the surface with two coats of VELATURA AQUA.
- To adjust the application viscosity, thin with 5% water.
- Apply the second coat after the first coat has dried.
- For optimum results, apply 2 coats of PRESTIGE AQUA water-based enamel over 2 coats of VELATURA AQUA.

Restrictions

- Do not apply at temperatures below 5°C or above 35°C.
- Do not apply when relative humidity exceeds 80%.
- Allow damp surfaces to dry thoroughly before application.
- Protect the freshly painted surface from cold and moisture for at least 24 hours.

Tools Cleaning

During application, keep tools wet in the container or paint tray. Drain as much paint as possible from the tools back into the tin, then clean them with water.

Storage

Store in a sealed container at temperatures between 5°C and 40°C.
